AMONG THE COLLEGES.

HARVARD.

RAISING THE REQUIREMENTS OF THE LAW

Cambridge, June 12 (Special).-With the departm of the university crew for New-London last Monday and the leaving of the freshman crew for New-London to-morrow, the only athletic interest in Cambridge is in the nine. The University crew stock has taken a sudden rise since Harry Keyes has given his consent to coach the crow, and although he has said that he cannot give all his time from now on to the care of the men, yet the college at large feels that he will really do so when he sees how much the crew needs his personal supervision. The freshman crew leaves o New-London, thence to their quarters at Captain folthrep's mansion, four mile up the Thames. D. P. Jones, '92, will go down to New-London as co whole, the erew has made at improvement in their faults. It is expected, however, that the regular twice-a-day work at Kew-London will render these faults less noticeable and put the vim and precision into the stroke which is necessary for victory ever

the freshman crows of Yale and Columbia. For some time there has been a desire among the reductes of Haryard to publish a graduate magazine, and at a meeting of graduates held in the winter a committee of four, including the secretary of Har-vard College, Mr. Bolles, was appointed to prepare a plan. This plan has now been made public, and i has been decided to publish such a magnaine. The principal reasons for its foundation are that classes have grown so large within late years that the infreconsiderable ignorance among graduates in regard to questions which arise in the administration of the university. The paper purposes to do three things-to give a record of the life of the university, to give ord of the life of the graduates, and to be medium of communication and an opportunity for the interchange of opinions between the two bodies. Prom twenty to forty men of each graduate class pay, as a risk, 35 per year for the support of the magazine and assume the control of it. This associaagazine and assume the control of it. This associaof the paper. The subscription price of the magazine will be \$1, and it will be issued in July, October, January and April, with chances for extra issues.

With the Harvard law School the next pressing estion is one of room. With a view to delaying ficult in two ways-first, by requiring all special regular candidates for admission, actically abelishing special; secondly, by increasing a admission requirements to Blackstone, Latin and the admission requirements to Blackstone, Latin and French, instead of Blackstone, Latin or French. The most important change, however, because the one most likely to affect the life of the school, is the division of the first year class into sections in all its work, except criminal law. This step, of course, involves the strengthening of the permanent teaching force. Two new members have been added to the faculty—Mr. Beale, a graduate of this Law School, in 1884, and Professor Wambaugh, who comes here from the Law School of the state University of Iowa.

Princeton, June 12 (Special).—The first class day exercises of Evelyn College were held on Tucsday morning, June 7. They were attended by the Profesmorning, June 7. They were attended by the Professors of Princeton College, who have been engaged in the work at Evelyn, and by a large number of prominent people from Princeton and other places. As the graduating class have done only the work of the special department, and not that of the full college course, there could be no regular commencement. The specches, however, consisting of the class history, by Josephine Reade Curtis, of Troy, N. Y., and the presentation and prophecy, by Frances Vincent Brown, of Pasadena, Cal., caused much laughter and prophers. A presting exercise was the presenting by applause. A protty exercise was the presenting by the class, of small bouquets of forget-me-nots and iden-hair fern to each of the students and instruc-s of the colleges. The class seng was then sung This was followed by a valedictory, by Lena Jewell Kline, of Portsmonth, Ohio, which was listened with much interest by the audience. Certificates of proficiency were presented to the class, certifying that they had passed examinations corresponding to those of Princeton College upon the studies pursued. After the singing of the class hymn, the benediction was pronounced by Br. J. O. Murray, Dean of Prince ton College and trustee of Evelyn.

A concert was given on Tuesday evening, by the idents of the music school, and a reception in th students of the music school, and a reception in the college parlors on Wednesday. The guests were received by the president and Mrs. Mellvaine, and a dance for the Evelyn students and the young people of the town followed in the evening. The graduating class and the class of '03 have been invited to remain at the college during the commencement exercises of Princeton College.

COLUMBIA PRACTICALLY DESERTED.

Columbia College has practically been abandoned since Wednesday, and the stadents have kept well away from Hamilton Hall, the library and every other part of the college. Most of them have gone out of own for the summer vacation, and some have gen o New-London to remain till after the boat race.

The new curriculum of the faculty of the School of Arts will be issued in pamphlet form this week, and it will give a detailed programme of all the elective courses. The composition of the faculty under the new constitution includes the president of the uni-versity and the professors of the eighteen depart-ments that make up the undergraduate curriculum. Of these departments eight are scientific, as Astronomy, biology, botany, chemistry, geology, mathematics, mechanics and physics. The others are classed as humanities and comprise English, German, Greek, Latin, history, literature, the Roman lan-guages, philosophy, rhetoric and political economy. In the sophomore year one of the classical languages may be dropped and chemistry substituted. In the junior year but four hours of logic and history are equired in the first term and psychology and political hours may be filled from a large and attractive list of electives, so that any tasts or inclination of the student may be satisfied. The list of electives of-fered to the seniors will be greatly augmented by the courses which the new faculty of Pure Science ex-
